Kit Rack by Genuwine

Economical, High-quality Modular Racking System

Kit Rack is a component style racking system, handcrafted from direct-sourced **Mahogany**, designed to meet the diverse needs and tastes of discriminating wine collectors.

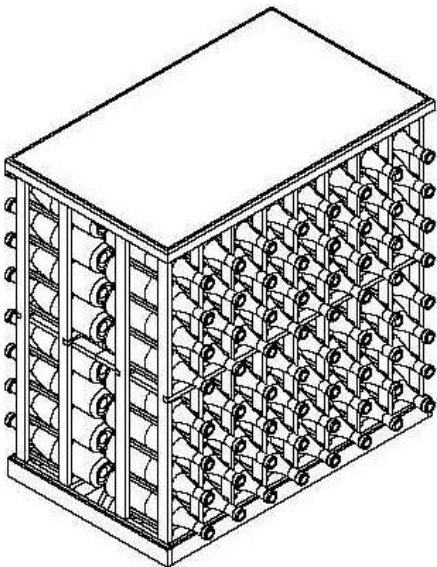

The overall dimensions of Kit Rack are consistent with the most commonly used racking system on the market.

This provides wine collectors with the ability to readily expand their existing wine cellars without compromising the appearance and proportions.

Prices are subject to change without notice. * All prices are in Canadian Dollars (Shipping from manufacturer and Taxes not included) - July 2017

Kit Rack Accessories

Stackable Modularized System

Stackable (32" and 48"H) Kit-Rack System gives you a new dimension of freedom, with our fully modular system. It's never been easier to go full wall height where you want to, or half wall height where you need. Mix and match to your heart's content with our nine basic rack styles, in standard widths and height. Easy assembly. Brackets and fasteners included.

- Depth of racks and base / molding kits are measured from front of rack to wall. Actual racking depth is 6 1/2" with 3" free space between the back of the rack and the wall.

- Crown molding can be adjusted to match ceiling height. (allowance is provided for shimming the base for leveling)
- Base and Crown molding round can be added to any configuration.

NOTE: All the above configurations assure alignment of modules. The 48" (Normal) modules are 47 3/4" high to allow for installation and exact modularity.
