Redrack System

The ultimate in wine racking systems. Racks that look great yet costs so little you can afford to put a few more bottles in them! Selected California redwood has that classic combination of beauty and durability, while Redrack delivers the simplest, most flexible system ever. Perfectly modular in order to accommodate heights other than 6' and 8'. The new system now gives 5 choices in height. Lightweight slim-line design, yet incredibly strong. Beautifully machined for a soft, smooth, consistent finish.

NOTE: Maximum capacities are based on standard Bordeaux style bottles; capacity will vary depending on style of bottle stored. Redrack modules ship knocked down, unassembled, assembly and installation is available in the Kelowna area. Modular wine racking is non-refundable once assembled.

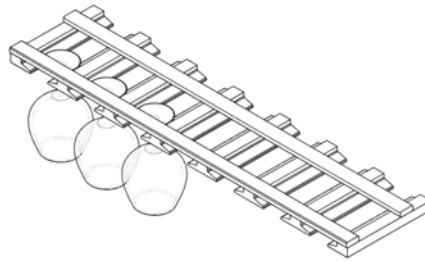

Prices and specifications subject to change without notice. Prices are in Canadian Dollars, FOB Kelowna, BC

Stackable Modularized System

Stackable (32" and 48"H) Redrack System gives you a new dimension of freedom, with our fully modular "Stackable" system. It's never been easier to go Full wall height where you want to, or half wall height where you need. Mix and match to your heart's content with our nine basic rack styles, in standard widths and height. "Snap and Tap" assembly in minutes with only a hammer. Brackets and fasteners included. Depth of racks and base / molding kits are measured from front of rack to wall. Actual redwood depth is 6 ½" with 2 ½" free space between the back of the rack and the wall.

- The stackable system is available in two heights, A (32") and B (48") allowing for the following modularity.

- Base / Crown molding can be added to any configuration. (allowance is provided for shimming the base for leveling)

NOTE: All the above configurations assure alignment of modules. The 48" (Normal) modules are 47 ¾" high to allow for installation and exact modularity.
